

rdwd: R interface to German weather service (DWD) data

github.com/brry/rdwd

ON CRAN

select, download + read data
time series from meteorological stations
raster data from radar + interpolation

rdwd: handle German weather data with R

- find, select, download + read data from the German weather service DWD
- vectorized, progress bars, no re-downloads
- index of files + meta data
- observational time series from 6k meteorological recording stations (2.5k active)
 - > rain, temperature, wind, sunshine, pressure, cloudiness, humidity, snow, ...
- gridded raster data from radar + interpolation
- european data stock slowly growing
